

Looking for a Sage 200 solution in the Cloud?

Onesys have the offering you need.

Giving you the flexibility that you need from your software.

Benefit from cloud computing, reduce IT expenditure and lose the administrative burden of server maintenance with our dedicated Microsoft Azure hosting service.

Using our hosting service, you can be sure that your systems and data are secure, backed up and accessible from multiple devices with the confidence of a reputable support team with SLAs.

Why choose Cloud hosting for your Sage 200?

Fast & Reliable

Automated deployment allows for fast provisioning in Azure from 1.5 days to 60 minutes, minimising the risk of interruptions in running your business due to downtime from unexpected outages.

Flexible & Scalable

Quickly add new capabilities and users as your business needs require.

Azure Backed Cloud Security

Depend on Microsoft Azure-backed security to help protect your data and the experience of 8k global customers who already successfully use their Sage solution in the cloud leveraging Microsoft Azure.

Cost Effective

Minimise the hassle and unexpected expenses associated with maintaining your own IT infrastructure – plus avoid the expense of retraining, or rebuilding your financial and commercial business solution.

Key benefits of Cloud hosting

Cloud can scale to meet your exact business needs.

Move from on-premise to the cloud securely quickly and easily.

Better manage business opportunity and continuity with anytime, anywhere access.

Cost effective cloud deployment options available from Sage business partners.

Trusted Azure-backed security and optimised web support.

No retraining required – keep using your Sage but in the cloud.

Different cloud deployment options available to best meet your needs.
